TD301X,TD302X,TD305X,TD307X Series

DIP6, DC Input, Random-Phase Photo TRIAC Coupler

Description

The TD301X and TD302X and TD305X and TD307X series combine an AlGaAs infrared emitting diode as the emitter which is optically coupled to a monolithic silicon random-phase photo triac in a plastic DIP6 package with different lead forming options.

With the robust coplanar double mold structure, TD301X, TD302X and TD305X series provide the most stable isolation feature.
